**ORDER**

On July 24, 2024, Governor Gretchen Whitmer signed Public Act 121 of 2024 (Act 121) into law. Act 121, in part, requires the Commission to develop a Renewable Energy and Electrification Infrastructure Enhancement and Development (RE-EIED) grant program for businesses, nonprofit organizations, units of local and state government, and Tribal governments for the purpose of planning, developing, designing, acquiring, or constructing renewable energy and electrification infrastructure projects, of which \$4.875 million is available to be awarded. Article 10, Part 2, Section 1005 of Act 121 (Section 1005) provides as follows:

- (1) From the funds appropriated in part 1 for renewable energy and electrification infrastructure enhancement and development, except as otherwise provided in subsection (10), funds must be expended only for grants to businesses, nonprofit organizations, and units of local or state government for the purpose of planning, developing, designing, acquiring, or constructing renewable energy and electrification infrastructure projects.

(2) From the total amount of funds for grants awarded under this section for electric vehicle fast-charging infrastructure, to the extent possible, grants should be awarded with a goal of distributing 50% of the total amount for charging ports with 2 connectors that provide charging at a power level of at least 200 kilowatts and 50% of the total amount for charging ports with 2 connectors that deliver charging at a power level of at least 350 kilowatts.

(3) The Michigan public service commission shall develop guidelines for the grant program described in subsection (1) and implement an application process for the grant program not later than 6 months after the effective date of this act and must first prioritize and approve grants that meet the goals of the governor's MI healthy climate plan.

(4) Applicants for a grant under this section must perform an impact study that includes an analysis of potential cost savings, environmental impacts, and local economic benefits of the applicant's proposed renewable energy and electrification infrastructure project. A utility, at its sole discretion, may prepare a single impact study that covers the utility's service territory that accounts for likely proposals, evaluates regional opportunities, and minimizes or eliminates the need for repetitive studies. Sufficient detail must be provided in the study to allow the Michigan public service commission to evaluate each proposed project, including how the proposed project will align with the governor's MI healthy climate plan.

(5) An applicant applying for a grant to be used to develop RNG [renewable natural gas] infrastructure shall include all of the following information in the applicant application:

(a) The project details, including the location of biogas and the proposed interconnection.

(b) The cost estimates for the interconnection, metering, and gas conditioning equipment needed to connect to an existing pipeline system.

(c) A summary of the environmental and health impacts of the project, including the forecasted emission reductions.

(d) Any local economic impact from the RNG infrastructure development.

(e) The end-use application for the RNG infrastructure with a focus on projects being used for opportunities in this state.

(6) After receipt of an application under this section, the Michigan public service commission shall allow local units of government, environmental groups, and business interests directly affected by the proposal 45 days to review the application and provide comments. The Michigan public service commission shall allow the applicant not less than 15 days after the comments have been received from interested parties, at the applicant's discretion, to modify or maintain the applicant's initial proposal.

(7) The Michigan public service commission shall review all proposals and award grants to applicants it determines have met the criteria in this section. All grants must include full and timely cost recovery from the fund for the infrastructure requirements of the affected utility made necessary by the grant. All grants must be awarded on a competitive basis with priority given to applicants in a distressed area. As used in this section, "distressed area" means any of the following:

(a) An area in a city, village, or township that has been designated as blighted.

- (b) A city, village, or township with a poverty rate and unemployment rate greater than the statewide average.
- (c) An area certified as a neighborhood enterprise zone under the neighborhood enterprise zone act, 1992 PA 147, MCL 207.771 to 207.786.
- (d) An area facing a disproportionate environmental burden, using the department of environment, Great Lakes, and energy's MiEJScreen or EPA's [U.S. Environmental Protection Agency's] EJSCREEN.
- (8) Not later than 30 days after the completion of the relevant project, grant recipients under this section shall submit a report to the Michigan public service commission that details how the grant money was used.
- (9) The funds appropriated in part 1 for renewable energy and electrification infrastructure enhancement and development must not be used to expand the use of conventional natural gas.
- (10) From the funds appropriated in part 1 for renewable energy and electrification infrastructure enhancement and development, the Michigan public service commission shall not use more than \$125,000.00, upon awarding of the grants, for administrative-related expenses incurred by the commission for the operation of the grant program. Funds supporting the grant program are appropriated in the Michigan public service commission upon awarding of the grants.
- (11) As used in this section:
  - (a) "Renewable energy and electrification infrastructure projects" includes, but is not limited to, renewable natural gas facilities and electric vehicle fast-charging infrastructure upgrades on publicly owned land within 1/2 mile of a United States highway or state trunkline roadway.
  - (b) "Renewable natural gas" or "RNG" means methane derived from organic material and degradable carbon sources, including, but not limited to, carbon sources and materials sourced from municipal solid waste, septage feedstock, plant materials, or food waste.

Pursuant to Section 1005 of Act 121, the Commission Staff (Staff) revised the "Renewable Energy and Electrification Infrastructure Enhancement and Development Grant" webpage within the Commission's website. The Staff also drafted a proposed Request for Proposals (RFP), which contains additional eligibility criteria. After review of the comments, the Commission finalized the RFP and made it available to potential applicants on January 21, 2025, through the Commission's RE-EIED grant webpage.<sup>1</sup> The Commission's webpage also provides the following timeline:
